EDUCATION

Massey University, Palmerston North

Bachelor of Information Science

Nov 2020

Computer Science and Information Technology

WORK EXPERIENCE

Full Stack Developer

March 2022 - Present

Vista Entertainment Group (.Net Framework, .Net Core, C#, Visual Basic, React)

- Utilized Cached Repository pattern to enhance user experience and reduce database calls.
- Improved the code and performance by replacing the complex algorithm with better design data structures.
- Lead a project by collaborating effectively with cross-functional teams.
- Maintained multiple legacy products to ensure user satisfaction and overall product stability.
- Improved the test automation runtime by 33% by leveraging available data, eliminating the need for restoring database snapshots
- Applied regression and performance testing techniques to identify and resolve an existing performance issue, improving product quality.
- Optimized the onboarding process, resulting in a 60% reduction in environment setup time for both new starters and existing developers.

Graduate Developer

February 2021 - March 2022

Enlighten Designs (.Net Framework, .Net Core, C#, Javascript, Bootstrap, JQuery, Xamarin)

- Managed and maintained web and mobile applications for various companies, ensuring continuous functionality and user satisfaction.
- Implemented backend and push notification for IOS/Android app to enhance customer communication and engagement.
- Redesigned and modernized client web applications, improving visual appeal, user experience, and overall performance.
- Utilized Asp.net and the Azure Alert system to establish a streamlined alert system, promptly identifying and resolving website issues.
- Demonstrated consistent ability to manage and complete multiple projects within specified deadlines.

Freelance

November 2020 - January 2021

Full-stack Developer (Python, Django, React and Google Cloud)

- Designed and developed a web application for efficient user database management, collaborating closely with clients to identify and address pertinent challenges.

Developer Intern

January 2020 - March 2020

Valocity (Javascript, Docker, K8s)

- Spearheaded the deployment and configuration of a GeoServer instance for robust geospatial data management.
- Created a simulated version of the Valocity main application using JavaScript and Python for comprehensive functionality testing.

PROJECTS

Takeout: UberEats clone

September – October 2020

Python, Django, ORM, HTML/CSS

- Created a web-based platform has been developed that allows customers to purchase food from restaurant menus.

SKILLS

Languages: C#, Python, HTML/CSS, JavaScript, SQL

Others: Git, Nodejs, AWS, Azure, GCP, Docker, Kubernetes, Django, React, Unix, .Net, ASP.net, Bootstrap, Linq, Entity framework, Entity framework core, Sql server
